RESPONSE TO RESTRICTION REQUIREMENT

COMMISSIONER FOR PATENTS  
ALEXANDRIA, VIRGINIA 22313

SIR:

In response to the Restriction Requirement stated in the Official Action dated November 16, 2004, Applicants in the above-identified patent application provisionally elect Group II, Claims 2-22, drawn to a method for making glass used in manufacturing an optical fiber and a method for manufacturing an optical fiber.

The Restriction Requirement asserts that the application contains claims to distinct inventions. However, MPEP §803 states the following:

If the search and examination of an entire application can be made without serious burden, the Examiner must examine it on the merits, even though it includes claims to distinct or independent inventions.

The claims of the present invention would appear to be of an overlapping search area.

Serial No. 10/824,429

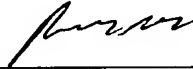

Response to Restriction Requirement dated November 16, 2004

Accordingly, Applicants respectfully **traverse** the Restriction Requirement on the grounds that a search and examination of the entire application would not place a *serious* burden on the Examiner.

However, if the present Restriction Requirement is not withdrawn, examination on the merits of the Claims of Group II is believed to be in order, and an early and favorable action to that effect is respectfully requested.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,  
MAIER & NEUSTADT, P.C.
